

DERAKHSHAN SAZ
ENGINEERING PLASTICS

Producer of advanced polymeric compounds

Company profile

DEP founded in 1999. The work is started on mid of 1997 as a project. After the feasibility study all the activity conducted in case of a new company. The company is shared 30 –70 among MEHR CAM PARS and Ikido. It is equipped with BUSS kneader and different dosing unit from Brabender. DEP has over 35 employees and annual capacity of 2500 metric tones per year.

Type of product manufactured – rang of product

- Finished compounds
- Toughened plastic compounds
- Toughened filled plastic
- Highly filled plastic
- Polymer Blends ABS-PC, PC+PBT
- Thermoplastic Elastomers
- Reinforced plastics
- Modified plastics – Reactive Extrusion
- PVC Modified compound (for wire coating)
- Concentrated mixtures or masterbatches
- Color master batch
- Antioxidant master batch
- Peroxide master batch
- Flame retardant master batch

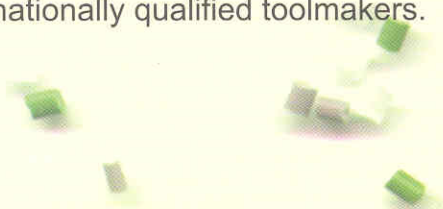

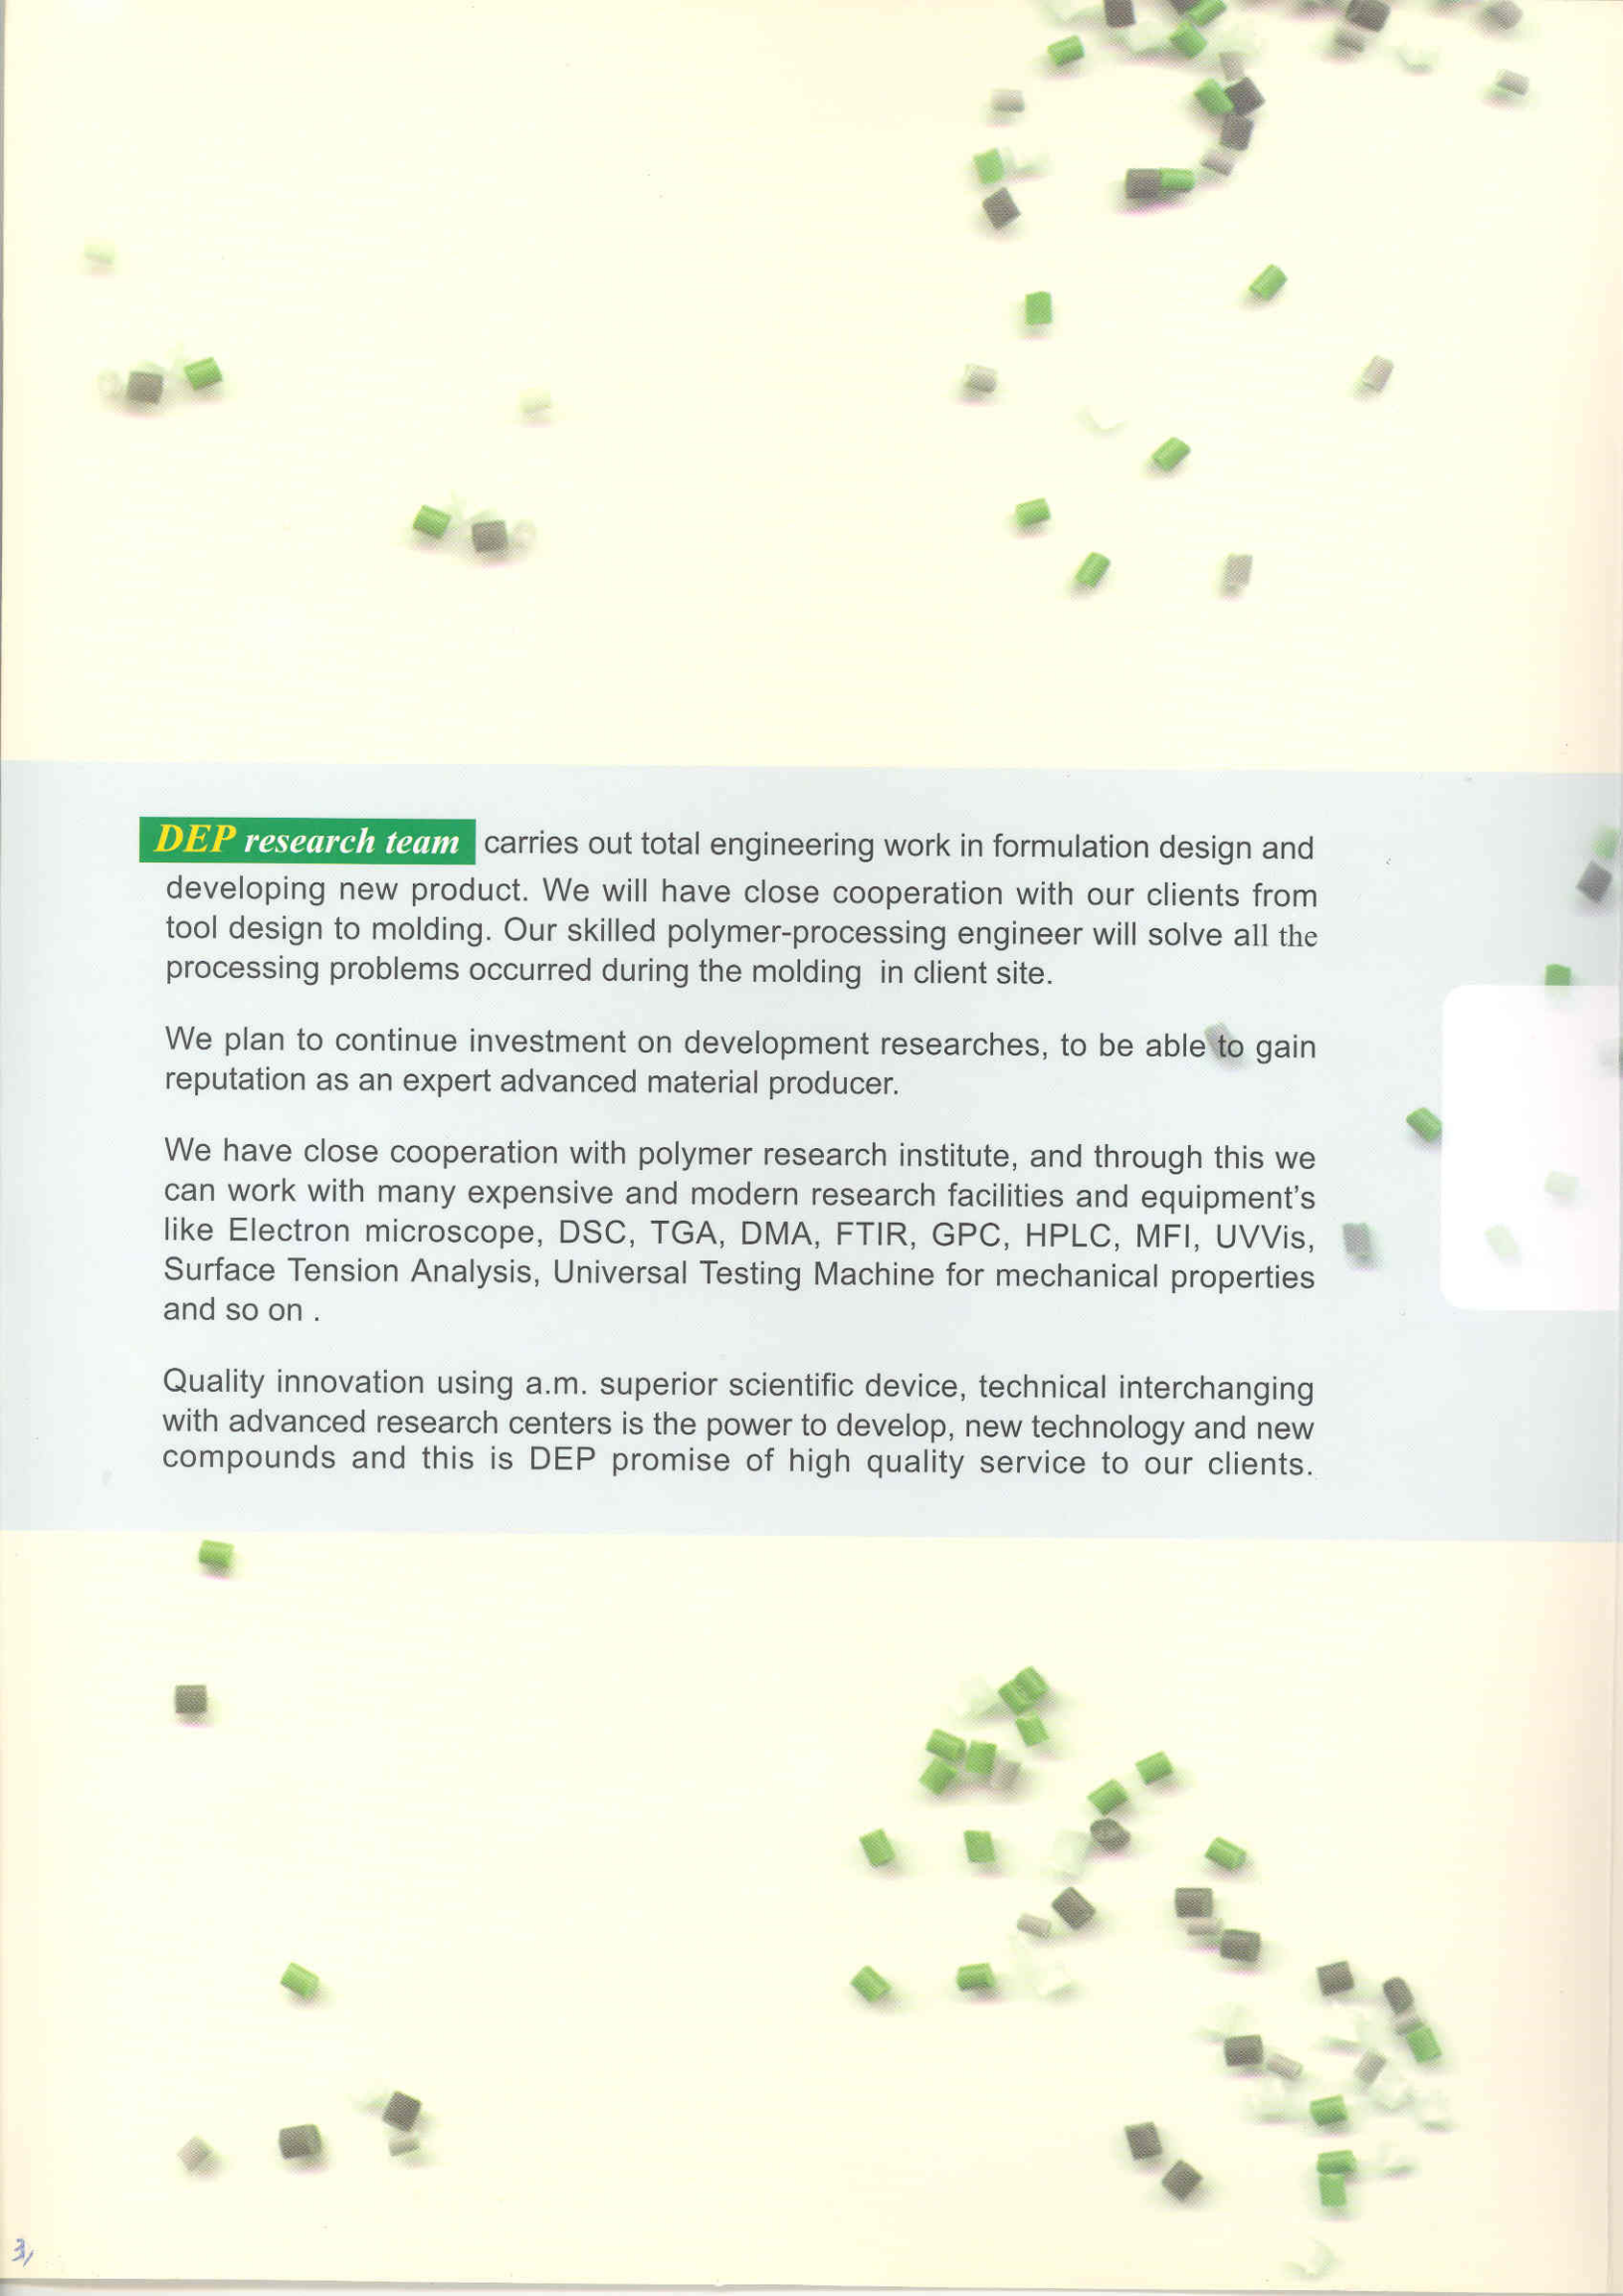

Technical service

- Assistance with product design
- Material selection
- Processing and troubleshooting
- Tool design

Vision:

Based on leading technical competitive power, DEP is willing to be recognized enterprise by clients through supplying high quality compounds and high level of technical services. We are in negotiation with Montell Co. for license of compounds. We will do our best to be the best enterprise for client's gratification and internationally qualified toolmakers.

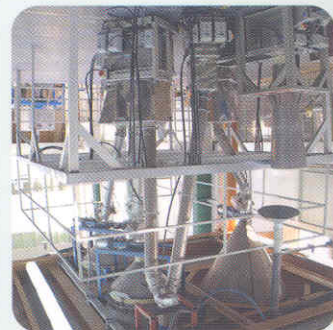

DEP research team carries out total engineering work in formulation design and developing new product. We will have close cooperation with our clients from tool design to molding. Our skilled polymer-processing engineer will solve all the processing problems occurred during the molding in client site.

We plan to continue investment on development researches, to be able to gain reputation as an expert advanced material producer.

We have close cooperation with polymer research institute, and through this we can work with many expensive and modern research facilities and equipment's like Electron microscope, DSC, TGA, DMA, FTIR, GPC, HPLC, MFI, UVVis, Surface Tension Analysis, Universal Testing Machine for mechanical properties and so on .

Quality innovation using a.m. superior scientific device, technical interchanging with advanced research centers is the power to develop, new technology and new compounds and this is DEP promise of high quality service to our clients.
